

Disc Medicine Announces Presentation of New Data from Phase 1b Trial of DISC-0974 in Patients with Chronic Kidney Disease (CKD) and Anemia at 2024 American Society of Nephrology (ASN) Kidney Week

October 11, 2024

WATERTOWN, Mass., Oct. 11, 2024 (GLOBE NEWSWIRE) -- Disc Medicine, Inc. (NASDAQ:IRON), a clinical-stage biopharmaceutical company focused on the discovery, development, and commercialization of novel treatments for patients suffering from serious hematologic diseases, today announced upcoming clinical data to be presented at the 2024 American Society of Nephrology (ASN) Kidney Week, which will be held in San Diego, CA on October 24-27, 2024. The poster will report on additional SAD cohorts from the Phase 1b, randomized, placebo-controlled study of DISC-0974 in patients with non-dialysis dependent chronic kidney disease (NDD CKD) and anemia. This study was designed to assess safety as well as changes to hepcidin, iron, and key hematologic parameters.

"We are excited to present an update from our ongoing Phase 1b SAD study of DISC-0974 in NDD-CKD patients with anemia at the upcoming Kidney Week," said John Quisel, J.D., Ph.D., President and Chief Executive Officer of Disc. "At the meeting, we'll be sharing data from the 40mg and 60mg dose cohorts on safety, pharmacokinetics, and effects of DISC-0974 on hepcidin, iron and anemia."

The abstract is now available through the ASN Kidney Week conference website.

Details of Presentation

Abstract Number: 4126178

Title: A Phase 1b, Double-Blind, Placebo-Controlled Study of DISC-0974, an Anti-Hemojuvelin Antibody, in Patients with Non-Dialysis-Dependent Chronic Kidney Disease and Anemia

Date / Time: Friday, October 25, 10:00am – 12:00pm PST

Presenter: Pablo Pergola, M.D., Ph.D.

About Disc Medicine

Disc Medicine is a clinical-stage biopharmaceutical company committed to discovering, developing, and commercializing novel treatments for patients who suffer from serious hematologic diseases. We are building a portfolio of innovative, potentially first-in-class therapeutic candidates that aim to address a wide spectrum of hematologic diseases by targeting fundamental biological pathways of red blood cell biology, specifically heme biosynthesis and iron homeostasis. Disc Cautionary Statement Regarding Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including, but not limited to, express or implied statements regarding Disc's expectations with respect to its phase 1b clinical study of DISC-0974 in NDD-CKD patients with anemia, the results thereof, and anticipated timing of release of data; and projected timeline for the initiation of the MAD portion of this clinical study. The use of words such as, but not limited to, "believe," "expect," "estimate," "project," "intend," "future," "potential," "continue," "may," "might," "plan," "will," "should," "seek," "anticipate," or "could" or the negative of these terms and other similar words or expressions that are intended to identify forward-looking statements. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based on Disc's current beliefs, expectations and assumptions regarding the future of Disc's business, future plans and strategies, clinical results and other future conditions. New risks and uncertainties may emerge from time to time, and it is not possible to predict all risks and uncertainties. No representations or warranties (expressed or implied) are made about the accuracy of any such forward-looking statements.

Disc may not actually achieve the plans, intentions or expectations disclosed in these forward-looking statements, and investors should not place undue reliance on these forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements as a result of a number of material risks and uncertainties including but not limited to: the adequacy of Disc's capital to support its future operations and its ability to successfully initiate and complete clinical trials; the nature, strategy and focus of Disc; the difficulty in predicting the time and cost of development of Disc's product candidates; Disc's plans to research, develop and commercialize its current and future product candidates; the timing of initiation of Disc's planned preclinical studies and clinical trials; the timing of the availability of data from Disc's clinical trials; Disc's ability to identify additional product candidates with significant commercial potential and to expand its pipeline in hematological diseases; the timing and anticipated results of Disc's preclinical studies and clinical trials and the risk that the results of Disc's preclinical studies and clinical trials may not be predictive of future results in connection with future studies or clinical trials and may not support further development and marketing approval; and the other risks and uncertainties described in Disc's filings with the Securities and Exchange Commission, including in the "Risk Factors" section of our Annual Report on Form

10-K for the year ended December 31, 2023, and in subsequent Quarterly Reports on Form 10-Q. Any forward-looking statement speaks only as of the date on which it was made. None of Disc, nor its affiliates, advisors or representatives, undertake any obligation to publicly update or revise any forward-looking statement, whether as result of new information, future events or otherwise, except as required by law.
